

Brain Injury and Housing Insecurity: Understanding the Connection

Event Topic

[Brain Injury](#)

Date / Time

Wed, Aug 9, 2023
11:00am - 12:00pm

Location

Virtual

Description

Emerging evidence has begun to show a significant relationship between sustaining a brain injury and experiencing housing instability. Although the prevalence of brain injury among unhoused populations has been relatively established, there is recent focus on the occurrence of brain injury for those who are facing housing insecurity, and how brain injury impacts a person's trajectory into homelessness. This presentation provides an overview of the connection of brain injury and housing status, as well as recommendations and strategies to prevent and address housing instability in this population.

Individuals with disabilities are encouraged to attend all University of Iowa sponsored events. If you are a person who requires a reasonable accommodation in order to participate in this program, please contact Victoria at victoria-keith@uiowa.edu.

The Iowa Board of Certification has approved the training for 1.0 CEU of Counseling Theories & Techniques.

Live ASL interpretation will be provided and Zoom captions will be enabled. Other reasonable accommodations may be requested by contacting Victoria by emailing victoria-keith@uiowa.edu.

Participants will receive a certificate of attendance within 30 days of the webinar.

Presenter(s)**Caitlin Synovec (NASHIA)**

Caitlin Synovec, OTD, OTR/L is an occupational therapist with clinical experience in working with adults experiencing homelessness to improve quality of life and engagement in their preferred communities. Caitlin's experience also includes program development for collaborative and interdisciplinary care and clinical education and training for health care and direct service providers. Both her clinical work and workforce development address the intersection of homelessness, poverty, traumatic brain injury, mental health, and chronic conditions, and their impact on health and community living. She is currently a Senior Program Manager for the National Health Care for the Council and consultant for the National Association for State Head Injury Administrators.
