CEUs have been applied
for with the
Iowa Board of Certification.

“Capacity” is the second step of the Strategic Prevention Framework, but the work of capacity building is essential in every step. Whether you are assessing a community's readiness, planning a prevention event, implementing a program, or sharing evaluation results, having the right stakeholders at the table is essential. We can't reach and sustain outcomes without capacity.

During this webinar we will cover:

- Key concepts for building capacity
- Considerations of cultural competence and health equity
- How building capacity builds sustainability

This foundation will help explore how we can continue to build capacity and work toward outcomes while working in the current landscape impacted by COVID-19.

The webinar will include multiple points for interaction and discussion. Come prepared to share your questions, challenges, and successes.

Clare Grace Jones, M.Ed., CPS is a Training Consultant and Project Manager for the Iowa Department of Public Health. She has almost 15 years of experience working in public health, including work in direct service and in providing training and technical assistance. She has worked with various sectors in her work as a community prevention specialist, been a capacity coach, a prevention director and worked as a consultant and associate for the CAPT.
